4.2	Skin contact	Remove contaminated clothing.
4.3	Ingestion	Consult a physician or transport to emergency facility immediately.
4.4	Inhalation	Remove to fresh air.
4.5	Further information	None.
5	Fire-fighting measures	
5.1	Suitable extinguishing media	Water. Water fog, carbon dioxide, foam, dry chemicals.
5.2	Extinguishing media to avoid	None under normal conditions.
5.3	Further information	
6	Accidental release measures	Wear adequate personal protective equipment, see Section 8 (Exposure Controls/Personal Protection) Prevent from entering into soil, waterways and groundwater. Spills should be contained by, and covered with suitable absorbent material and removed for disposal. Dispose of according to local and national regulations.
7	Handling and storage	
7.1	Handling	Avoid eye contact. Wash hands and exposed skin before eating, drinking or smoking and after work.
7.2	Industrial hygiene	Follow normal industrial hygiene standards. Do not consume or store food in the work area.
7.3	Storage	Keep container tightly closed and dry.
7.4	Fire- and explosion protection	Not combustible.
8	Exposure controls / personal protection	
8.1	Technical equipment	Good general ventilation should be sufficient for most processing operations. Vent work area to ensure airborne concentrations are below the current occupational exposure limits. 10 or more room air changes per hour containing a minimum of 15% fresh air, will meet these requirements.
8.2	Control of threshold limits	None established.
8.3	Personal protective equipment	
8.3.1	Respiratory protection	No respiratory protection needed under normal conditions. Good general ventilation should be sufficient.
8.3.2	Hand protection	Use chemical resistant gloves. In case of prolonged immersion or frequently repeated contact use gloves made of the materials: Butyl rubber (thickness \geq 0.36 mm, breakthrough time $>$ 480 min), nitrile rubber (thickness \geq 0.38 mm, breakthrough time $>$ 480 min) or neoprene (thickness \geq 0.65 mm, breakthrough time $>$ 240 min). For intermittent splash protection corresponding gloves with breakthrough times $>$ 60 min can be used. Avoid gloves made of: natural rubber.
